

PANEL SAW MACHINE

RK-1600-PRO

A professional series PANEL SAW MACHINE with a scoring unit designed for longitudinal, cross and angular cutting of panel materials (MDF, particle board, plywood, plastics...) as well as solid wood. It is an essential machine in all small, medium and industrial productions. It is equipped with manual tilt and height adjustment, scoring unit adjustment, an extendable front fence, a dust cover and an auxiliary fence with a protractor.

PREMIUM SLIDING SYSTEM

Premium sliding table system ensuring ultra-smooth movements with high precision, without lubrication or special maintenance. Widely recognized as the top choice for high-end format saws.

POWERFUL MOTORS

The powerful, high-quality motors with a working power of 4kW and 0.75kW, deliver exceptional performance.

ROBUST CONSTRUCTION

The reliable, robust construction eliminates vibrations, ensuring stable operation and longevity. It is built to high standards of quality and durability.

THE IDEAL CUTTING TABLE

The sliding table measuring 1600mm in length, combined with an ergonomic design, makes this panel saw the perfect pick for operations requiring high-precision cutting.

PRECISION STOPS

Two stops equipped with magnifiers and clamps allow for precise adjustments to the preferred dimensions.

Main motor power

4.0kW

Scoring saw power

0.75kW

Sliding table dimensions

1600x375mm

Main blade diameter

300mm

Main motor speed

4000/6000 rpm

Scoring saw diameter

120mm

Scoring saw speed

8000rpm

Main blade shaft diameter

30mm

Scoring saw shaft diameter

20mm

Distance from blade to rear fence

1200mm

Main blade and scoring saw tilt

45° - 90°

Machine dimensions

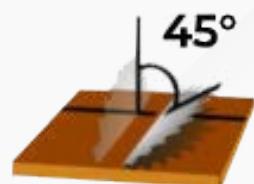

1600x2450x900mm

Packing dimensions

1120x1250x980mm / 430x1830x260mm

Weight

450kg

ANGLE CUTTING

Machine features height and tilt adjustment for precise angle cutting.

ERGONOMIC DESIGN WITH POWERFUL MOTORS!
