

TTC450

CNC ROUTER

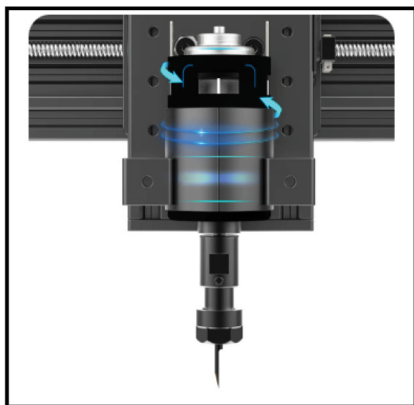

CREATING UNLIMITED POSSIBILITIES

**1 YEAR WARRANTY
AND UNLIMITED SUPPORT**

Engraving size	460x460x80mm
XY axis positioning accuracy	0.1mm
Stepper motor	A4988, 1.3A / 17HS8401S, NEMA23 20mN.m
Engraving precision	0.01mm
Engraving speed	800mm/min
Spindle	500W, 12000rpm
Engraving method	USB connection\APP\wireless computer WEB side\offline
Carving material	Plastic, soft aluminum, wood, acrylic, PVC, PVB and other soft materials
Software recognition format	NC, DXF, BMP, JPG, PNG, GCODE
Continuous working hours	≤6 hours
Engraving mode	Graphic engraving, file engraving, scan en- graving, contour engraving, pixel engraving
Control panel	ESP32 32-bit main control board
Language	English, Italian, French, German
Power supply	24V 5A 120W
Operating system	Windows, MAC
Support CAM software	Candle, Carveco, Artcam, Easel
Working environment	Temperature 5-40 degrees Celsius, humidity 20-60%RH
Color	Black
Machine material	Aluminum profile + plastic
Leadscrew size & type	T8 2mm pitch, 4mm lead 5 start acme lead screw
Height adjustment method	Lifting module adjustment (automatic)
Machine size	782x670x390mm
Weight	25kg

High speed spindle

Standard 80W spindle reach 7000rpm, upgraded spindle 500W reach 12000rpm, quiet and fast heat dissipation, making the engraving smoother.

Large working area

Large working area 460x460x80mm, 70% preassembled, meet most engraving needs, commercial batch manufacturing and artistic design, unlimited engraving.

Strong and durable construction

The metal frame is equipped with high-quality screw rods for smoother and more stable operation.

Support offline engraving

Connect and control it easily, supports operation via TF card and USB connection. Supports LightBurn or Laser-GRBL with 20W laser Module.

Accurate to the millimeter

Limit stops on all axes for high engraving accuracy 0.01mm, instant stop switch for safe operation.

Wide range of applications

Creates 2D and 3D works on a wide range of materials, including plastics, acrylic, industrial plastics, metals and more.
